Material (common name):

Separation presently done () Wet () Dry

How is it presently screened if screened at all?

What is the present feed rate?

What improvement should this test accomplish if this applies?

What is the desired feed rate?

Maximum Particle _____ () Inches () MM () Mesh

% of moisture present

Bulk Density _____ lbs./Cu. Ft.

Specific Gravity:

% Solids in Slurry () Volume () weight

Material () F. () C

Viscosity

Particle Shape () Angular () Spherical () Cubical

() Silvery () Flake () Other

Characteristics: () Abrasive () Corrosive () Toxic () Explosive
